

Filip Szalewicz

Principal Engineer / Head of Engineering | Agentic AI, Digital Twins, Multi-Agent Systems Macomb, MI | Open to Remote Work | [linkedin.com/in/fszalewicz](https://www.linkedin.com/in/fszalewicz) | fszale@gmail.com | github.com/fszale | solidcage.com

Summary

Principal engineer and Head of Engineering with 20+ years of experience building SaaS platforms, data systems, AI products, and cloud infrastructure. Hands-on technical contributor and people leader who drives impact across the enterprise: designing digital twins, multi-agent systems, and Agentic OS patterns that help organizations adopt AI directly inside active delivery workflows. Partner with executive leadership, technical leaders, and engineering teams to train AI best practices, implement governance and human-in-the-loop controls, and accelerate measurable outcomes across product and operations. Recent work includes organizational transformation for a 150-person technology company; agent-powered SaaS products such as vizly.ai v2, LookingGlass Lifestyle v2 (web and iOS), and Data Reaktor that use AI LLMs for data analysis, image processing, enrichment, and classification; and acting as an agent of change driving AI-first enablement and adoption across client organizations.

Core Competencies

- Agentic AI Strategy & Transformation - AI adoption strategy, operating models, organizational change, delivery acceleration
- Digital Twins & Multi-Agent Systems - twin design, agent factories, agent orchestration, context design, workflow decomposition
- Agentic OS & Workflow Automation - ecommerce and business workflow automation, human-in-the-loop approvals, guardrails, self-improvement loops
- Agent-Powered SaaS & Data Products - AI-assisted analytics, image processing, lead intelligence, big-data enrichment and classification
- AI Governance & Evaluation - approval flows, auditability, guardrails, feedback loops, measurable outcomes
- Cloud Runtime Engineering - Python, FastAPI, Node.js, Next.js, Supabase, Docker, Kubernetes, Cloud Run, AWS, GCP, Azure

Professional Experience

Solid Cage Inc Macomb, MI *Principal Consultant, Fractional CTO & SaaS Founder* | 2009 - Present

- Lead agentic-first transformation programs for multiple clients, including a 150-person technology company, partnering with executive leadership, technical leaders, and engineering staff to accelerate AI adoption across the organization.
- Contribute as a principal engineer while leading people and delivery, shipping production systems and coaching teams so AI lands inside live workstreams rather than side projects.
- Train leaders and delivery teams on practical AI best practices, workflow redesign, and operating models that embed AI directly into projects already in flight instead of isolated experiments.
- Drive development and adoption of digital twins in preparation for agent factory deployment, defining roles, context, guardrails, and governance patterns for production use.
- Architect Agentic OS patterns for end-to-end ecommerce workflow automation using human-in-the-loop approvals, guardrails, structured context, and self-improvement loops.
- Founded and scaled consultancy delivering 50+ SaaS, data, and analytics solutions with 95%+ client retention.

Shoptelligence Ann Arbor, MI *Vice President of Engineering* | 2022 - 2025

- Architected a 15+ TB data lake and warehouse platform, reducing analytics retrieval from 3+ weeks to 1 day.
- Built ETL pipelines with Airflow, Spark, Data Fusion, and BigQuery, boosting integration speed by 75% and supporting \$1M+ ARR growth.
- Established data quality standards and CI/CD practices that reduced support tickets by 500%.

Rocket Mortgage (Quicken Loans) Detroit, MI *Principal Engineer / Team Lead, Data Science* | 2017 - 2021

- Architected a petabyte-scale data lake and ELT platform using AWS Glue, Spark, and Cloudera, reducing annual cost by more than \$1M.
- Led enterprise data fabric and MDM integrations that improved compliance and increased loan volume by 10%+.
- Operationalized ML platforms on AWS using SageMaker, Lambda, and Athena for fraud detection and risk modeling.

West Monroe Partners - Senior Architect (2021 - 2022)

360ofme Inc - CTO / Principal Engineer (2016 - 2017)

Earlier Roles: Healthcare SaaS, secure payments, enterprise reporting, integration frameworks, ERP, and industrial systems.

Selected Public Agentic AI Work

- agent-kernel - Reusable digital twin knowledge layer with agent skills, prompts, templates, diagrams, and automation for consistent execution.
- agent-factory - FastAPI runtime for hosting digital twins with model routing, Supabase-backed persistence, admin governance, and Cloud Run deployment patterns.

- agentic-playbook - Role-based adoption layer for engineers, architects, executives, compliance leaders, and power users implementing agentic AI.
- operational-intelligence-lab - Open methodology connecting AI implementation to rate-of-improvement, ROI modeling, training, and business deployment.

Education and Supporting Information

- Oakland Community College - Associate's in Computer Information Systems
- University of Phoenix - Information Systems Management coursework
- AWS Certified Developer - Associate (2018)
- AWS Certified Solutions Architect - Associate (2018)
- Microsoft Certified Professional: Requirements & Solution Architecture (2000)
